# Press Release

**The popularity of the upcoming Hwy 68-80 400 Mile Antiques, Collectibles and Stuff event continues to grow as does the number of hits on the website.**

"We Make Things Happen" Corporation continues to see a tremendous increase in traffic on their Website at [trailsRus.com](http://trailsRus.com) as more and more people are using this site to find updated information on the upcoming 400 Mile Sale taking place June 1-4 this year. "If the hits we are receiving are any indication, we should expect over double the number of shoppers this year as well as yard sale locations", says Judy Ross, website developer for the event.

The 400 Mile Sale website includes detailed information of where vendors may set up booths along the route, activities and special events taking place during that time, the numerous antique and novelty shops who will be offering special sales during the 4-day event as well as a list of lodging and unique dining opportunities offered along the route. And if you have not ordered a brochure yet which includes a detailed map and special coupons, do so today by e-mailing us from the website, calling (270)781-6858 or visiting any of the local chambers or tourist commissions located along the route.

**This 400 Mile "Antiques, Collectibles and Stuff" 4-day event from Paducah Kentucky to Maysville just keeps growing so you better start saving your "stuff" ...**

Calls are coming in from local residents along the route as well as folks from out of town asking if they may set up yard sales during the event. The planners of the upcoming 400 Mile Sale are excited that so many people have expressed an interest and wish to participate. "The more the merrier," says one of the event planners. "We want yard sales popping up all along the route so start saving your stuff!"

"We only ask that where yard sales are set up, that there be ample room for parking. We do not want to have any cars pulled off on the shoulder or blocking traffic in any of the communities", stated Debby Spencer, one of the planners of the event. "And we encourage those individuals not from the area to work with local communities and residents to find locations well off the road or utilize the designated vendor locations being set up within each of the communities". A list of contacts for each community and vendor site along the route is available on the website. "Special "400 Mile Sale" signs are also available and as soon as you know where you are setting up your yard sale", says Ms. Spencer, "contact us and we will feature the location on the website at no charge".
